M.Sc ICT 2nd Semester

Assignment – 3

Submission Date: 16-03-2026

1. Describe the Bluetooth protocol stack. Explain the role of different layers such as LMP, L2CAP, RFCOMM, and SDP.
2. Explain Mobile IP in detail. Describe the role of Home Agent, Foreign Agent, and Care-of Address in the Mobile IP communication process.
3. Differentiate between Wi-Fi and WiMAX technologies based on range, speed, coverage area, frequency band, and applications.
4. What is RFID technology? Explain the components of an RFID system and describe how RFID is used in real-world applications.
5. A large supermarket wants to automate its billing and inventory system using RFID technology. Explain how an RFID-based system can be implemented in the supermarket. Describe the components required (RFID tags, readers, database, middleware) and explain how the system will help in automatic billing, inventory tracking, and theft prevention.
